```

Single Instance Test

Setup

- **Client**: EC2 (t3.small, us-west-2), connected via private IP to server-1
- **Server**: 1× server-v2 (t3.micro, 54.214.134.25), bypassing ALB
- **Consumer**: CONSUMER_THREADS=80, isDuplicate only on redeliver
- **RabbitMQ**: t3.small
- **Redis**: ElastiCache

Results

Metric	Value
Publish rate	5,436/s
Consumer ack rate	5,444/s
Ready messages (queue backlog)	**0**
Unacked (prefetch buffer)	~26
Redelivered	0.00/s
Queue graph shape	Small ripples (20–60), drops to 0

Stable

Consumer ack rate (5,444/s) ≥ Publish rate (5,436/s). No backlog accumulates. The small queue fluctuations (~20–60 messages) are normal in-flight prefetch buffer, not a sawtooth.
